**Precision**  
with Xavier

# Great insights start with great data

Precision is the ultimate data toolkit for Xero (and Quickbooks) users. It provides error-free data and proactive insights. Upskill your practice and become a business partner for your clients, and increase revenue through more billable advisory to grow your business.

## Precision...

“  
**Action  
tasks to  
deliver  
more  
billable  
work**  
”

### Cleans up data

Automatically track changes, easily back-check data and spot errors before they become a problem, through Xavier's clean up toolkit.

### Boosts productivity

Xavier's Focus dashboard tracks team workflows so you can see the progress of jobs throughout your practice. Action tasks to deliver more billable work, faster.

### Provides bespoke reporting

Turn real time data into bespoke client reports on supply chain spending, tax risk and cash position - unlock a new level of billable advisory services.

### Gives you instant Health Scores

Save time when onboarding. With your client's Health Score you quickly understand the state of their books, and drive more profitable pricing.

“ Precision is trusted by 1 million users globally ”

## How does Precision work?

Precision scours your Xero history and, using a traffic light system, provides alerts for common errors and inconsistencies.

It then provides the detail, so you can dismiss these alerts or click through to fix them in Xero.

You can add all your clients to Precision for oversight on your data quality across your entire practice.

## Why Precision?

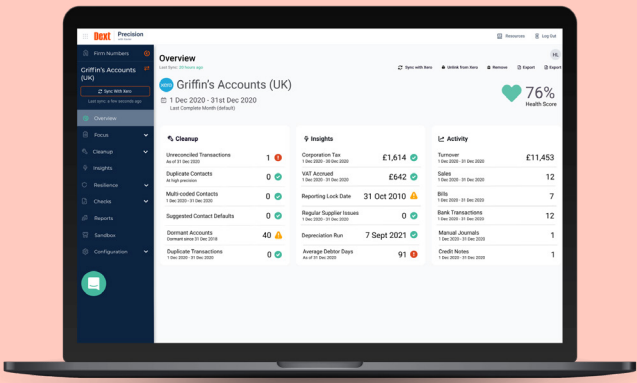

Precision is trusted by 1 million users globally.

That means one million people trust us to get them better insight from their data. We also integrate with any accounting software provider, most banks and all major suppliers.

It's actionable insights and award-winning assurance that gives you complete trust in your data.

## How much does it cost?

Precision starts at £5 per month, per client. Bulk pricing and enterprise plans are available.
